

MASSIVE DELIVERIES FOR THE KØGE BUGT HIGHWAY

DAV NORDIC A/S has worked at the Køge Bugt highway extension for a year and a half.

DAV H2 bridge guard

DAV NORDIC A/S has supplied 7 km of side guard with adjoining ramps, bridge guard for 4 bridges with proprietary DAV H2 bridge guard and 400 m wildlife fence. In the delivery, DAV H2 bridge guard is delivered to the bridge that will go across the new station, Køge Nord, which will be established in 2017. The wildlife fence will safely guide frogs and toads from the adjacent lakes during the road. The extension of the Køge Bugt highway will be established at the same time as the establishment of a highway from Copenhagen to Køge.
